## AZHYAR.673541.020 TU

Axial leaded capacitors. Polar. Sealed. Isolated and non-isolated.

Capacitors are suitable for application in direct current, ripple current and pulse current circuits in secondary power supplies and converter equipment. Capacitors are available in all-climate and temperate/cold climate version.

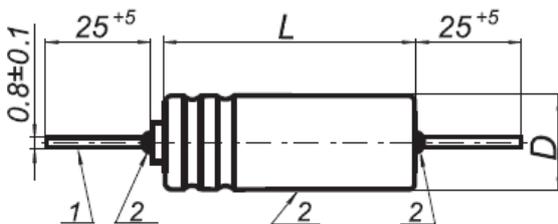

The capacitor type is produced for the internal wiring with the requirements to 98% air humidity at  $T=35^{\circ}\text{C}$  and  $T=25^{\circ}\text{C}$ .

It is recommended to use this capacitor type as substitution for capacitors K50-15, K50-29, K50-20, K50-24 type.
